Handle With Care

LEARN MORE →

The Tamper Evident Label provides security for your food delivery.

The label is simply applied over the fold or opening of your bag, adhering to the packaging. The adhesive is not resealable.

Instead, upon opening of the bag the label will destruct. This communicates to customers that the bag has been compromised.

Alternatively, if the label is intact, the customer is assured that the bag and its contents have not been tampered with.

Overall, delivering trust from point A to B.

How It Works

Figure 1: Peel label off the roll.

Figure 2: Apply label over the fold/opening of paper bag.

Figure 3: Paper bag with delivery bag security label applied on top. If the bag arrives like this, customers know it was not opened after purchase.

Figure 4: Opening the bag rips the label in half.

Figure 5: Now with the label ripped, customers know if their bag has been opened after purchase.

The Tamper Evident Label is available in rolls of 250.

(4 rolls in a case)
