

Exceptional Staying Power.

Introducing **WetStick™**, the first water proof label of its kind designed specifically for the horticulture industry. Apply your label to wet surfaces without undermining the adhesive.

Why Change **Your In-Line Process?**

Sometimes you need to label after a watering tunnel. Low performing labels may make your process difficult. With WetStick™, labeling after a watering tunnel is no longer an issue.

Take the **WetStick Challenge**

Take the WetStick™ challenge. Grab the WetStick label, dip in water, apply it to a container and try to peel it off. The WetStick™ label bonds in both wet and dry conditions.

Your Labels **Are Bound To Get Wet.**

From rain to watering tunnels your label is bound to get wet. Shouldn't they perform well? Now they can.

With the WetStick™ label you no longer have to worry about waiting for your containers to dry before labeling them. **You can even apply the label under water.**

Get the best results with the WetStick Label™ by choosing the right applicator. The Label Gator™ applicator system is the only print and apply applicator developed for the horticulture industry.
